EPL: Activity 9

An issue I would like to change within my community is to have a homeless shelter in Huron. There are many homeless people in Huron fighting for survival. Many have built their own homes from cardboard and other found materials. They barely have access to water, electricity, and, more importantly, food. From my point of view, the people of Huron are very welcoming and involved with the community. A homeless shelter would be a great fit in our community of Huron, where everyone is united.

To accomplish this change, I want people to get together and donate or help at the homeless shelter. Donations such as clothes, food, hygiene products, etc. would be accepted. To reach this goal, the homeless shelter would offer community service hours to high school students and those who need them. The homeless shelter would offer employment to those who would rather work, but you would be able to help as a volunteer. Employees and volunteers would help serve meals, provide job assistance, training, and counseling. The shelter would also partner with charities, local businesses, and organizations. Having a homeless shelter would create a stronger and safer community for the people of Huron.

Right now, there aren't any places for the homeless people in Huron to go. They have nowhere to stay when the weather gets rough. During the summer, it goes up to 105° minimum, and the homeless have to endure the heat all day if they have nowhere to stay. Studies show an increase of 60% homeless people due to extreme heat waves. Same as when the weather drops to

colder temperatures. During the winter in Huron, the weather is very cold, and it rains a lot. Rain can ruin the homes the homeless have built for themselves. In times like those, a homeless shelter would provide a cool and safe environment.

Imagine if one of your family members or close friends became homeless, how would this make you feel? Wouldn't you try to help them, or at least make sure they get the help they need? Imagine if you were the one who became homeless, you would want to get help from someone or somewhere, right? Imagine if it were you were the one sleeping on a park bench, shivering through the night, with little to no heat coverage, thinking whether or not you're going to eat the next day. Anyone can become homeless at any age. Some children also become homeless and have nowhere to go. No one should have to go through something like this, which is why homeless shelters will be a big help in my community.
